## CHARACTERISTICS

The Droughtmaster is a medium sized breed, tan to red in colour. It has a short sleek coat with loose skin to enable it to lose heat in the sun.

The cows have a range of qualities such as calving ease with Bos indicus pelvic structure traits and low weight calves, strong maternal instincts; high milk production and the females mature early - some in calf at 14 months.

The bulls are docile, virile and mature early making a longer working life possible. The important breed characteristics of low birth weights and calf shape are passed on by Droughtmaster bulls, and can be very advantageous in crossbreeding or joining to heifers.

## HISTORY

Droughtmaster was the name originally coined by a group of astute cattlemen in North Queensland for the breed of cattle which they developed through crossing Bos taurus and Bos indicus breeds to overcome the perennial problems of drought, cattle ticks, heat, eye cancer and many other problems that reduced production and profitability. With the arrival of cattle ticks into North Queensland in 1896, it became apparent that maintaining herds of British breed cattle (such as Shorthorns, Herefords and Shorthorn-Devon cross) in the harsh tropical environment was virtually impossible. Consequently, graziers began experimenting with crossbreeding. In 1910 three Zebu bulls (the first Bos indicus cattle imported into the area) from the Melbourne Zoo were made available to grazier friends in the north by the Curator of the Melbourne Zoological Gardens.

In 1926 a northern grazier, Mr R L (Monty) Atkinson saw several descendants of the Melbourne bulls, and despite the region experiencing severe drought conditions at the time, all the Zebu-British cross cattle were in good condition.

He was so impressed by the descendants of the Zebu bulls from Melbourne, that he set about attempting to develop a breed which had the attributes required to withstand the severe environment of the tropics (from the Zebu), but in the right proportions to retain the benefits offered by the British breeds (Bos taurus). A consignment of Brahman cattle was imported into Queensland in the early 1930's and Monty Atkinson was given access to three red half-bred Brahman bulls, which through the following years he joined to Shorthorn and Shorthorn-Devon cross females. The best quarter-bred progeny were selected for retention in the breeding herd. This process was carefully carried on over the years in a 'grading-up' program.

The pioneer breeders, through careful culling and selection of progeny from the crossing of Bos indicus and Bos taurus genetics, created the Droughtmaster breed, an adaptable, fertile and easy-care breed.

The gradually accumulated knowledge concerning the relatively high resistance of zebu-type cattle and their crosses to a number of diseases and adverse environmental conditions is reviewed and related to recent findings which show that Droughtmaster cattle carry about ten times fewer ticks than cattle of British breeds. Zebu-type cattle are also considerably more resistant to babesiosis.

Even when Queensland herds were first infected with ticks and babesiosis clearly show that, within a breed, bulls were the most and calves the least susceptible to babesiosis.

These facts concerning disease resistance are considered to be important in relation to the development of cattle industries in tropical countries.

The following definition of Bos indicus: "A bovine with a well-developed musculo-fatty thoracic hump and dependant dewlap. In the male the prepuce is pendulous and in the female the umbilical fold well developed. It has a coat consisting largely of straight modulated hair fibres and the sweat glands are larger and more numerous than in Bos taurus. The thoracic spines are bifurcated and the caudal vertebrae do not extend into the distal portion of the tail covered by the switch.

**CASHMERE DROUGHTMASTERS HEREBY OFFER YOU SOME OF THE BEST GENETICS AVAILABLE OUT OF AUSTRALIA.**

# DROUGHTMASTER SIRES

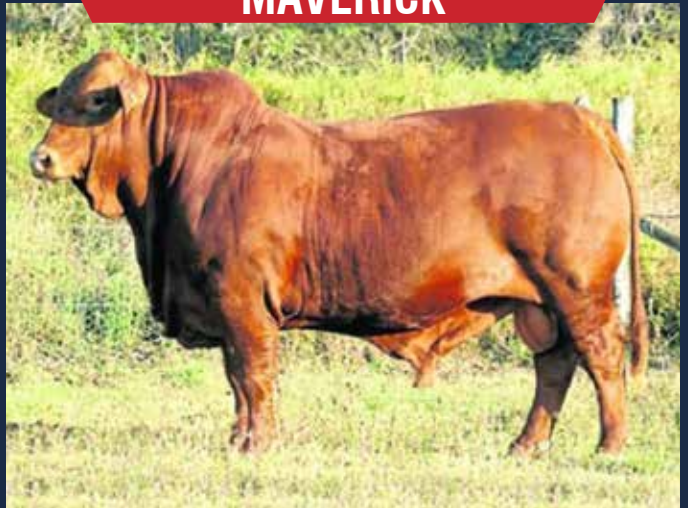

## MAVERICK

Maverick will add softness, depth and incredible fertility and amazing weight-for-age. His dam had 9 calves with a 331 day calving interval.

Maverick was also successfully shown, collecting breed champion and interbreed accolades as an 18 month old.

CLONLARAMR ED 9P) D5  
WYLANDRA 214 - 2 9P) D5  
WYLANDRA 702 9P) D5

**DAM:** CASHMERE HOLLY (P) D3  
CASHMERE 358 9P) D3  
CASHMERE CLAUDIA II 9P) D2  
CASHMERE CLAUDIA 9P) D1

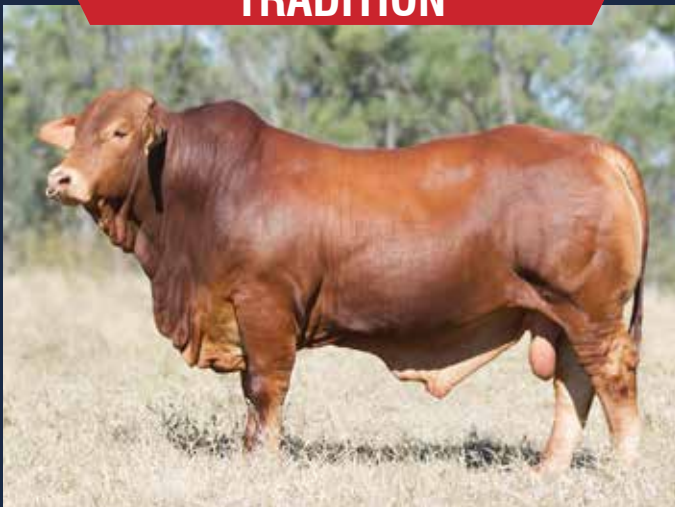

**NOTES:** Maverick displays amazing length, depth and red meat capacity. He is soft, easy fleshing bull who will add fertility, consistency and great udders to any herd.

Maverick was judged Grand Champion Droughtmaster Bull and Interbreed Champion Bull at the 2012 Clermont show. His interim EBV's placed him in the top 5% for milk, top 10% for 200, 400 & 600 day growth and top 15% for rib fat. His mother is 11 years old and has 9 calves and is back in calf with a DCI of 372 days. He was 33 kg at birth. Maverick is also Homozygous Polled (98%PP).

**DOMESTIC \$:** Export only, please contact us for EXPORT pricing.

**EXPORT \$:** Available, please contact us for EXPORT pricing.

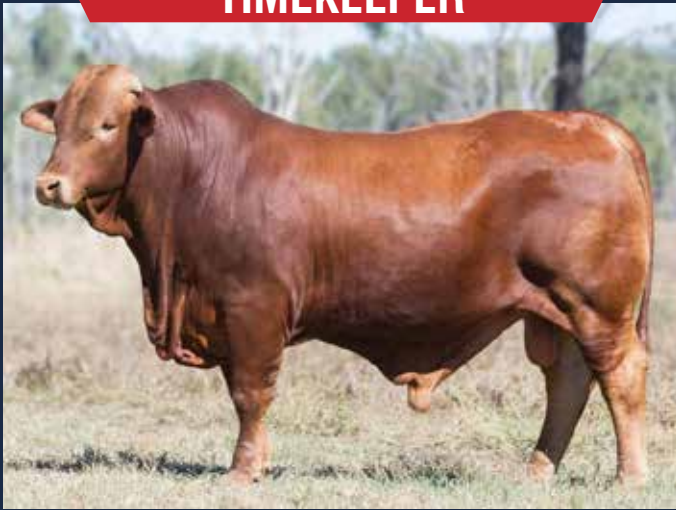

## TRADITION

Introducing a spectacular bull – Glenlands Tradition who's the sire to many of the animals on offer at this year's. He is genetically compatible with the South African Droughtmaster type. He has bred us exceptional calves. Boasting a lovely deep hindquarter, indicus content, a tropically adapted flatback. Tradition is also the sire to the Top selling bull at the 2020 Super Beef & Vova Genetics 6th production sale VOVA 17177 selling at an impressive R300k

## TIMEKEEPER

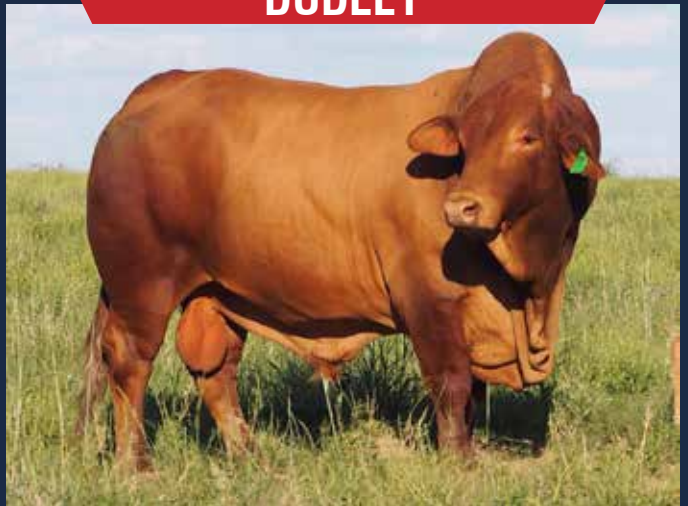

Timekeeper is a bull with amazing length and volume. Where his true value is seen is in the glorious females he has left behind. He has real capacity with that, comes the extra weight and yet exceptional low birth weight. On sale day at he was 24 months and weighed 896kgs and delivered an EMA of 142 and an IMF reading of 4.8.

Introducing Dudley.... A splash of outside blood which has worked out well. He comes with a bit more Indicus content, a clean underline and that lovely deep hindquarter.

Back home in Australia, 2 sons have sold at auction to average a very solid AUD\$20,500.

In August in South Africa, 3 sons sold exceptionally well at a sale at 'Underberg' to top at R160,000 and average R120,000.

## DUDLEY

## LEEROY

We introduce a sire represented quite heavily throughout the catalogue. Cashmere Leeroy has sired sons that have sold to AUD\$60,000. Length, thickness and loaded with beef. Packed in a Homozygous Polled package.

His EBV's are powerful. Top 1% for 200 Day, Top 5% for 400 Day, 600 Day, Scrotal Size, Carcass Weight, Eye Muscle Area & Retail Beef Yield.
